Computers and Internet have become an integral part of Modern life. Any blessing may have an inbuilt curse. The hazard of cyber crime is a case in point. We are familiar with stories of stolen credit card numbers, mindless hackers upsetting the functions of websites, stealing of digital information, online theft of bank deposits, and spreading of viruses through e-mails. Someone may break into your system and alter or erase your files. The problem has huge dimensions in respect of large institutions operating in the digital world. Victims include businessman, government and the general public. Steps have to be evolved to prevent cyber risks and maintain online operations safe and healthy. Human being has invented machines and gadget for his own good and to make his life better but at the same time he falls into the trap of his own creations. It has been a blessing to thousands of people across the globe but little knowledge of the applications have made much portion of mankind to fall prey to different kinds of theft and risks. If such crime is not prevented and fought against, this computer world would face lots of untold mishaps and losses evolved in it.
