PART-B (CONVENTIONAL TYPES - 25 MARKS)

*This Part should be answered only on the **Answer Sheet** provided.*

Marks for each question is indicated against it.

Attempt all questions.

1. Write an essay on **any one** of the following topics:

(15)

- (a) Effects of Climate change.
- (b) Significant of Biodiversity Conservation
- (c) Benefits of Career Planning for students

2. Read the passage and answer the questions that follow:

Education has always played a crucial role in shaping individuals and societies, but in the modern era, its purpose has expanded beyond the mere transmission of knowledge. Today, higher education aims to develop critical thinking, creativity, and adaptability in students so they can respond effectively to rapid social, technological, and economic changes. With the growth of digital technology, learning has become more flexible, interactive, and accessible to wider population than ever before. Online learning platforms, virtual classrooms, and digital libraries have transformed the traditional classroom environment. Students can now access academic materials from anywhere in the world, collaborate with peers across different regions, and learn at their own pace. This flexibility has been especially beneficial for learners who balance education with work or other responsibilities. However, the increased reliance on technology also presents challenges. Excessive screen time, lack of personal interaction, and unequal access to digital resources can negatively affect learning outcomes. Moreover, the abundance of information available online requires students to be more discerning. They must learn to evaluate the credibility of sources, distinguish facts from opinions, and apply knowledge ethically. As a result, higher education institutions emphasize research skills, analytical reasoning, and effective communication. Teachers are no longer viewed solely as providers of information but as facilitators who guide students in the learning process. In this evolving educational landscape, lifelong learning has become essential. The skills acquired during college are no longer sufficient for an entire career. Continuous learning, adaptability, and openness to change are necessary to remain relevant in a competitive global environment. Thus, modern education seeks not only to inform students but also to empower them to become responsible, informed, and capable individuals.

- (a) What is the expanded purpose of higher education in the modern era? (2)
- (b) How has digital technology changed the learning environment? (2)
- (c) Mention two challenges associated with technology-based learning. (2)
- (d) Why is evaluating online information important for students? (2)
- (e) Why is lifelong learning considered essential today? (2)
